DEVASHISH KUMAR

+91 6200280508 | devashishufraul@gmail.com | Devashish Kumar | Github-profile

PROFESSIONAL SUMMARY

Aspiring Cloud & DevOps Engineer with hands-on experience in AWS, Docker, Jenkins, Kubernetes, and Linux. Built CI/CD pipelines, containerized applications, and automation projects using AI-assisted rapid development workflows. Skilled in Python, web development, and AI/ML-based projects with strong foundations in DSA and system fundamentals. Seeking entry-level Cloud/DevOps roles to build and scale real-world systems. Deployed multiple AI and automation projects end-to-end using cloud and CI/CD pipelines.

EDUCATION

- Bachelor of Technology in Electronics and Communication Engineering (2022-2026), GIET University, Gunupur
- HSSC -70% Vidya Bhawan Balika Vidyapeeth, Lakhisarai (2021) by CBSE
- SSC -71% Vidya Bhawan Balika Vidyapeeth, Lakhisarai (2019) by CBSE

PROJECTS

Individual Project

AI-Assisted Hiring System (AI + DevOps Project)

- Developed and deployed an AI-based Hiring System using Python , Flask and LLM API
- Implemented resume parsing and AI-based candidate ranking system not only like traditional Ats system
- Dockerized the application and Configured Jenkins CI/CD pipeline for automated build, test, and deployment on an AWS EC2 instance

IEEE Report Generator (AI + DevOps Project)

- Built an AI tool that converts raw reports into proper IEEE-format papers automatically.
- Implemented section parsing, academic rewriting, and reference formatting using FastAPI and LLM APIs.
- Deployed on AWS using AWS Amplify .

Group Project

AI-Based Surveillance System

Tech: Python, OpenCV, YOLO, Media Pipe, Face Recognition

- Built a real-time AI-based surveillance system to detect theft and anomalous activities from camera feeds.
- Integrated face recognition for authorized and unauthorized person identification.
- Implemented OpenCV-based processing and alert logic for suspicious events.

TECHNICAL SKILLS

Cloud & DevOps

- AWS services (EC2, S3, IAM, VPC)
- Docker (images, containers, Dockerfile, Docker Compose)
- Kubernetes (pods, deployments, services — basic)
- Linux (CLI, file system, permissions)
- Git & GitHub
- Jenkins for CI/CD Pipeline

Programming & DSA

- Python
- Data Structures & Algorithms

Web Development and Databases

- HTML, CSS, Java Script
- React Js, Node js
- MySQL & MongoDB

Computer Science Fundamentals

- Computer Networking (TCP/IP, HTTP, DNS – basics)
- AI/ML Fundamentals
- AI- Assisted Software Development

AI-Assisted Development Tools: ChatGPT, Antigravity, Claude, Gemini.

CERTIFICATES

- **OCI AI Foundations** – Oracle Certified AI Foundations Associate (2025)
- Internship certificate on Front-end Development - Cognifyz Technologies (1 month)
- Internship certificate on DevOps Engineering - GIET UNIVERSITY (1 month)
